This year's WWDC was chock-full of exciting software (and software-only) announcements, but for me, everything paled in comparison to one particular macOS reveal: When macOS Mojave ships, you'll be able to use Siri and the Home app to control your HomeKit-enabled accessories on the Mac.. Once you've done that, you issue your commands all the same and Siri will take care of the rest! Have any specific questions about the Home app in macOS? Give me a shout in the comments below or over on Twitter and I'll do my best to answer your queries!For more videos.. It adds a Dark Mode toggle to the menu bar so you can turn Dark Mode on and off without needing to open up System Preferences.. In previous versions of macOS, the Photos app had a top navigation bar with an optional sidebar.. Paste is a Mac App Store app, but a free trial is also • (Free) - Station is an app that's designed to house and aggregate all of your web applications in one easy to access location.

It lets you do things you simply can't with other computers That's because it's designed specifically for the hardware it runs on — and vice versa.. • (\$19 99) - If you want to edit video on an iPad but want something more than iMovie, LumaFusion is a powerful video editing option that you'll want to take a look at.. Instead of saying, 'Hey, Siri,' or holding down the Home Button or Side Button on your iOS device though, you'll use your keyboard shortcut, Siri app icon, or Siri menu bar icon to trigger the virtual assistant.. It has been optimized for Apple Pencil, so you can create works of art with Apple's stylus.. Instead of having dozens of tabs open with things like Gmail, Twitter, Instagram, and Slack, you can relocate them all to Station for quicker, more streamlined access.. It's just as intuitive as it is on iOS And Siri works, too? Along with the Home app, you'll also be able to use Siri on the Mac to control your HomeKit-enabled accessories just like you do on iOS.. • (\$9 99) - Sip is a niche app, but it's useful for artists, designers, interior decorators, app developers, and other content creators who like to create and maintain color palettes.. And there's a reason for that See, Apple is working on making it easier for iOS developers to bring their apps to macOS and they've started this work by bringing over News, Stocks, Home, and Voice Memos. e10c415e6f
